THE INS AND OUTS OF HCPCS Modifiers

Modifier 59 is replaced with 4 new HCPCS modifiers.

Here's what you need to know:

- XE SEPARATE ENCOUNTER:** Distinct because it occurred during a separate encounter. E.g. when the provider performs a procedure on the patient's right eye and CMC in the morning (code 90000 and 90001) and administers intravitreal injection (J9000) in multiple sites for treatment of chronic retinitis in the afternoon.
- XU UNUSUAL NON-OVERLAPPING SERVICE:** Distinct because it does not meet usual components of the base service. E.g. when the physician performs a flapless (11918) and implements greater occipital nerve block (04450) during the same encounter.
- XS SEPARATE STRUCTURE:** Distinct because it was performed on a separate anatomical site. E.g. when the doctor administers a right (11918-RT) and left (11918-LT) shoulder injection (04450).
- XP SEPARATE PRACTITIONER:** Distinct because it was performed by a different practitioner. E.g. when Dr. A administers a breast biopsy, collects the aspirate (86300) following the patient's breast surgery and Dr. B collects the aspirate (86300) before discharging them from the recovery area.
